

SunlightVitamin™ Sport & ArtProtect – Everything You Need in One Capsule!

Until now, the active ingredients commonly used as supplements for joint inflammation and cartilage health could only be purchased separately in pharmacies or health stores.

Our **Napfényvitamin Sport & ArtProtect** combines all these beneficial compounds into one powerful formula that works on two levels:

it may **help reduce inflammation** and **support the regeneration and maintenance of healthy cartilage and joints**.

8 Components – 8 Reasons Why This Product Leads the Market

Turmeric extract, Boswellia extract, Black pepper extract, Type II Collagen, Hyaluronic acid, MSM, Organic Zinc-Copper complex.

Structurally Healthy Skin and Connective Tissue

Unlike typical beauty supplements with poorly absorbed ingredients,

Sport & ArtProtect contains only components directly involved in **the regeneration and protection** of skin and connective tissues against oxidative stress and environmental damage (Hyaluronic acid, Type II Collagen, Zinc).

Active Ingredients per Capsule

Ingredient	Amount	NRV%
Turmeric extract (Curcuma longa) – of which curcumin	200 mg (100 mg) –	
Boswellia serrata extract	50 mg	–
Type II Hydrolyzed Collagen	100 mg	–
Hyaluronic Acid	100 mg	–
MSM (Methylsulfonylmethane)	100 mg	–
Black Pepper Extract – of which piperine	10 mg (1 mg)	–
Zinc (as zinc gluconate)	2.145 mg	21.45%
Copper (as copper gluconate)	213 µg	21.3%

Main Ingredients and Their Key Benefits

Turmeric root (Curcuma longa) and Indian Frankincense (Boswellia serrata) –

Used for centuries in Ayurvedic medicine for joint health.

Curcumin is known for its **strong anti-inflammatory properties**, comparable to non-steroidal anti-inflammatory drugs (NSAIDs), but **without side effects**.

Boswellia may help **slow down cartilage degradation** and has been shown to **reduce joint stiffness and pain** within two weeks in clinical trials.

Black Pepper Extract (Piper nigrum) –

Enhances the **bioavailability** of other ingredients like turmeric and **improves circulation** to muscles and joints.

Hyaluronic Acid & Type II Collagen –

Key components of **cartilage, skin, and connective tissue**.

Hyaluronic acid acts as a **natural lubricant**, protecting joint surfaces, while collagen supports **elasticity and structure**.

MSM (Methylsulfonylmethane) –

A natural source of organic sulfur, known for its **anti-inflammatory and pain-relieving** properties. May improve joint flexibility, reduce degeneration, and relieve muscle tension.

Zinc-Copper Complex –

Supports **connective tissue regeneration** and **elasticity**.

A proper zinc-to-copper ratio (10–15:1) prevents copper deficiency and optimizes trace element absorption.

Key Advantages of Sport & ArtProtect

- Combines ingredients that support **joint function, cartilage health, and anti-inflammatory balance**.
- Recommended for **athletes, physically active individuals, and older adults** suffering from joint wear.
- **Cost-effective** – replaces multiple separate supplements.
- Thanks to its high-quality **collagen, hyaluronic acid, and organic zinc**, it can also serve as an **effective beauty supplement** for women.

Product Features

- ✓ GMP-certified
- ✓ Free from GMO, sugar, lactose, gluten, titanium dioxide, and doping substances
- ✓ No artificial additives or colorants

Capsule shell: gelatin

Package: 30 capsules (titanium dioxide-free)

Recommended daily dosage: 1 capsule with a meal

⚠ For joint inflammation, please consult your physician and supplement your diet with vitamin D. Do not exceed the recommended daily dose!

This product is **not a medicine** and **does not replace a varied diet**.

Its ingredients have been clinically studied for their effectiveness in supporting healthy joint and cartilage function.
